

Half day seminars on New Trends in Plasmonics

13:30–17:00, December 16, 2019,
Room 287, Sci. Bld. 1 (East), The University of Tokyo
東京大学本郷キャンパス 理学部1号館287号室

New Class of Visible-to-NIR Responsive Plasmonic Nanoparticles

Toshiharu Teranishi (Kyoto Univ.)

Scalable Plasmonic Nanogap- Enhanced Raman Scattering Probes

Jwa-Min Nam (Seoul National Univ.)

Using Supramolecular Chemistry to Regulate Nanoparticle-Cell Interactions

Luis M. Liz-Marzán (CIC biomaGUNE)

Plasmonic Hole Ejection Involved in Plasmon-Induced Charge Separation

Tetsu Tatsuma (UTokyo)

Optical Properties of Ultrathin Nanorods

Tatsuya Tsukuda (UTokyo)

Contact: Tatsuya Tsukuda (tsukuda@chem.s.u-tokyo.ac.jp)
